TO CARE MED

OUR PROJECT

The Tourism Carrying Capacity Limit (TCCL) tool developed in the ALTERECO project addresses the risk of over-tourism and its impact on the natural and cultural heritage of Mediterranean destinations.

The TO CARE MED project will extend the TCCL tool to other coastal, island, rural and protected natural tourist destinations, focusing on two aspects. First, the TCCL tool will be adapted to each destination. Then, it will be transferred using a 'cascade training model'. This will bring methodologies from the transnational level to local learning and implementation.

Total budget
€ 1.499.596,80

Project duration
27 months

Interreg Funds
€ 1.199.677,44
